

## Benefits of Lunar Travertine 1 ¼" Pavers & ½" Tile

### Freeze-Thaw Resistant

Lunar Travertine Pavers and Tile allow moisture to migrate vertically through the stone, making them ideal for exterior installations in all types of climates.

### Strength & Durability

More than twice the strength of concrete.

### Cool Under Foot

Even in direct sunlight, Lunar Travertine Pavers and Tile stay cooler than other types of man-made and stone paver materials.

### No Efflorescence

Unlike cementitious products, Travertine Pavers and Tile are not subject to efflorescence.

### No Aggregate Exposure

Our Travertine Pavers and Tile are natural stone and not subject to aggregate exposure that can occur with other types of pavers.

### Non-Fading

Since Lunar Travertine is a natural stone, it is not subject to color fading inherent in other types of man-made pavers.
